

CA Live API Creator

Trial Version INSTRUCTIONS

Welcome to CA Live API Creator! This is an evaluation copy; to run it, simply follow these steps:

- 1) First, make sure that you have **Java JDK 7 or later** installed on your computer (note: you will need **JDK** and **not JRE**) and that you also have at least 100MB of free disk space
- 2) For a Windows computer, simply double-click on the **Start.bat** file, located in the **CALiveAPICreator-Jetty-2.0.00.2-B2B** folder; from a Unix/Mac Terminal, navigate to the location of the **Start.sh** file, then run the following command: **sh Start.sh**
- 3) Several command lines will then execute within few seconds; normally, after 10-15 seconds, a message similar to this should appear, indicating that the server is up:

```
CA LAC
2016-02-17 09:40:54.833:INFO:oejs.Server:main: Started @2910ms
```

Note: If port 8080 is already in use on your computer, you will see a number of error messages including:

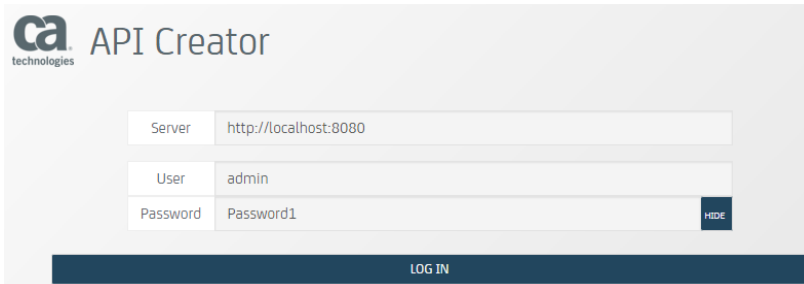

```
Caused by: java.net.BindException: Address already in use
at sun.nio.ch.Net.bind0(Native Method)
at sun.nio.ch.Net.bind(Net.java:437)
at sun.nio.ch.Net.bind(Net.java:429)
```

In that case, edit the Start.bat file (Windows) or the Start.sh file (Unix/Mac) and modify the following line at the end of the file from:

```
cd CALiveAPICreator
java -DSTOP.PORT=8123 -DSTOP.KEY=stop_caliveapicreator -jar ..\start.jar
cd ..

to:
cd CALiveAPICreator
java -DSTOP.PORT=8123 -DSTOP.KEY=stop_caliveapicreator -jar ..\start.jar -Djetty.port=8181
cd ..
```

- 4) Launch a web browser, then navigate to **http://localhost:8080/APICreator** (or **http://localhost:8181/APICreator**, if you have modified the file in the steps above); a login screen will then appear. Your Username is **admin** and your Password is **Password1**

ca technologies API Creator

Server	http://localhost:8080
User	admin
Password	Password1

LOG IN

- 5) Once you click on **LOG IN**, the **CA Live API Creator Welcome Window** will be presented to you; it is a good idea to get familiarized with the various options and features that the product offer by completing the four steps (Orientation, Walk-throughs, Guided Tour and Advanced Samples) before using the product from your end
- 6) When using a specific feature from the left Menu, a **Context Help** is available on the right side of the screen, providing you additional info and hyperlinks for specific documentation related to the feature. Also, a complete **documentation page** is available at **http://ca-doc.espressologic.com/docs** at any time
